ARBOR NOSOLOGICA
or A TREE of DISEASES.

EXPLANATION of the TREES.

The branches given off from the Trunk represent in the one the Medicinal Substances; in the other, the Diseases. If the Medicines be vegetable, then the first name is the generic name, the second, the specific: the next division of the branch represents the parts used, which are named; and the last division the preparations of these parts: attached to which are the doses, & the diseases in which these medicinal preparations are employed, which are numbered and lettered: — The numbers representing the genus of disease; the Italic letters, the species of Genus; - and the Greek letters, the varieties or Sequels of the disease; — The abbreviations made use of are Inf: for Infusum; - Dec: for Decoctum; - Muc: for Mucilago; - Ol: for Oleum; - Ext: for Extractum; - Mist: for Misbura; - Sp: for Spiritus; - Syr: for Syrupus; - Conf: for Confectio; - Pulv: for Pulvis; - Emp: for Emplastrum; - Pil: for Pilulæ; - Cer: for Ceratum; - Ung: for Ungentum; - Lin: for Linimentum; - Catap: for Cataplasma; - Am: for America; - S: for South; - N: for North; - Esch: for Escharotic; - Emet: for Emetic; - C: for Compositum; - Indig: for Indigenous; - Eur: for Europe; - Ms: for Mountains &c. - When one Medicinal preparation is written above a bough coming from another bough, this points out that such preparation is made from the preparation marked on the bough, from which the said bough comes.
